

AUTO POWER ADAPTER

The Lind Automobile Power Adapter is designed to power your mobile device and to charge its internal battery from an appropriate DC voltage power source (see adapter label for acceptable DC voltage ranges). The adapter supplies current and voltage levels as required by your device.

The adapter provides a safe power source by protecting your device from spikes and power surges which may occur in a DC voltage electrical system.

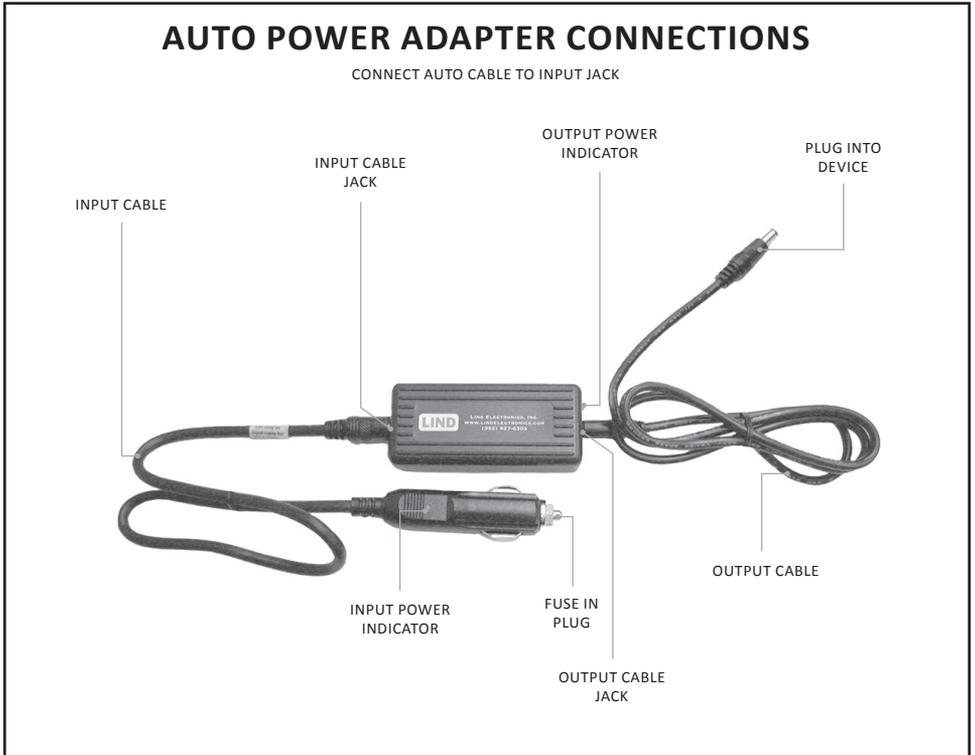

Contact Lind at (800) 659-5956, or via email at techsupport@lindelectronics.com, to place an order or for help with any questions.

OPERATING INSTRUCTIONS

Plug the input cable into the input jack of the adapter and the output cable into the output jack of the adapter.

The output cable plugs directly to the jack on the electronic device where the AC power supply is normally connected.

TECHNICAL INFORMATION

Power Input	Noted on label
Power Output:	Noted on label
Input Fuse:	See label on input cable
Indicators:	LED on lighter plug on some models (Input present) LED on adapter (Output power present)
Features:	Output Short Circuit Protected Output Current Limit Internal Overtemperature Shutdown Noise Filters

COMMON QUESTIONS ABOUT AUTO POWER ADAPTERS

What if the output LED on the adapter does not light when plugged in?

Some cars must have the engine running or have the ignition key to the ON position in order to have power occur at the lighter socket. It is also possible that one of the safety shut down circuits in the adapter has tripped. If so, allow the automatic reset to restore the output power for the adapter. You may have to unplug and replug the cigarette lighter plug to reset the adapter. Also check to see if the fuse on the adapter has blown.

Is it normal for the adapter to get warm during use?

Yes. Restricted air flow around the adapter may also cause the adapter to overheat and shut down. This is a safety feature and does not harm the adapter or your computer. Do not place the adapter in a vehicle glove compartment or other restrictive area, or cover it with anything that prevents the heat from dissipating.

Does it matter whether the input cable or output cable gets plugged in first?

No, the order in which you plug in the cables to the adapter does not matter.

Can I plug the computer into the adapter when it is running?

Yes, you may plug the computer into the adapter when the computer is running.

Can I start or stop the vehicle engine with the adapter plugged in?

You can start or stop the vehicle engine with the adapter plugged in; however, do not jump start the vehicle with the adapter plugged in. Many jump start systems use high voltages that will normally shut down the adapter output but extreme voltage spikes may damage the adapter circuitry. Also, starting the vehicle may turn the adapter off. Depending on your model, it may automatically restart after 10 seconds or you may have to replug the cigarette lighter plug to restart.

Can this Lind adapter be used with a multi-output cigarette plug splitter?

No, do not use this Lind adapter with multi-output cigarette plug splitters. These devices can cause the cigarette lighter plug on the adapter to become very hot. The plastic cases of multi-output cigarette plug splitters can trap the heat and not allow it to dissipate. Call Lind for alternate ways of connecting more than one device to your DC power source.

Replacement and direct input connection cables as well as replacement fuses are available from Lind. Contact Lind via email at techsupport@lindelectronics.com or at (800) 897-8994 to order, or for help with any questions.

LIMITED WARRANTY

Lind Electronics, Inc. (LIND) warrants the circuit assembly portion of products manufactured by it to be free of defects in material and workmanship for a period of 1 year from the date of purchase under normal use. During this warranty period, LIND will, at its option, repair or replace the product at no charge for parts or labor when the product is returned postage paid as a complete unit to LIND. Proof of purchase and a letter explaining the problem must accompany the returned unit.

This warranty does not apply if any part of the adapter, its cables or connection jacks have been altered, subjected to abuse, accident or misuse. This warranty excludes incidental or consequential damage resulting from the product or the use of the product. This warranty is in lieu of all other warranties expressed or implied and no person is authorized to assume for LIND any other liability in conjunction with this product. The warranty gives you, the purchaser, specific legal rights and you may have other rights which may vary from state to state and country to country.

The LIND product you are purchasing has not been designed for, or certified for use in, life support applications. Any such use is at your own risk. LIND ELECTRONICS, INC. HEREBY EXPRESSLY DISCLAIMS ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. Lind Electronics, Inc. will not be liable for any claims, awards, damages or other liability arising out of the use of LIND products for life support applications whether in the nature of direct, indirect, consequential, special or punitive damages.
